These plans shall show existing contours plus the proposed contours at the conclusion of soil-removal operations for the particular calendar year, together with a calculation of the cubic yards of soil to be removed.

In addition, the owner shall submit with the original application for soil removal an engineered plan depicting the intended final contours of the site, together with corresponding calculations, when all soil removal operations will be complete.

No application for a permit to remove soil per category (a) or (b) above shall be scheduled for hearing, unless and until the required contour plans and calculations accompany the application.

The Selectmen may suspend or revoke a soil-removal permit if fees are not remitted on a timely basis. If more than the permitted quantity of soil is removed, the owner of the land shall pay to the Town a penalty in the amount of five dollars (\$5.00) per each cubic yard in excess of the permitted quantity, up to a maximum amount of \$300 per calendar day or portion thereof until the soil in excess of the permitted quantity is returned to its original site.

If removed soil is being provided to the Town, the Board of Selectmen may waive payment of the fee of \$2.00 per cubic yard, but not payment of any penalties.

Section 7 CHANGES

A. If during the calendar year less soil was removed from a subdivision or from a commercially or industrially zoned property than was projected, the property owner may file an amended engineered plan. If and when the Board of Selectmen approves this plan, upon the recommendations of the Departments listed above, the fee advanced by the property owner shall be adjusted and rebated.

B. If during the calendar year the property owner wishes to remove more soil from a subdivision or from a commercially or industrially zoned property than was projected, the property owner must file an amended engineered plan. [Adopted May 18, 1985 ATM Article 19]

ARTICLE XIX SHIRLEY NON-ZONING WETLANDS BYLAW

1. Purpose and Application: The purpose of this Bylaw is to supplement the Commonwealth of Massachusetts Wetlands Protection Act, to further protect the wetlands, related water resources, and adjoining land areas in the Town of Shirley by regulating activities likely to have significant or cumulative effect upon resource area values, including but not limited to the following: public or private water supply, groundwater, flood control, erosion and sedimentation control, storm damage prevention, water quality, water pollution control, fisheries, wildlife habitat, and rare species habitat deemed important to the community. This Bylaw is intended to utilize the Home Rule authority of the Town to protect additional resource areas, for additional values, with additional standards and procedures stricter than those of the Wetlands Protection Act (M.G.L. Chapter 131, Section 40) and Regulations (310 CMR 10.00) thereunder.

The definitions and forms, as well as the plan, notice, and hearing requirements utilized under the Wetlands Protection Act shall continue to be applicable, however additional application forms may be required. The Shirley Conservation Commission is hereby designated as the enforcing authority for all matters within the jurisdiction of this Bylaw.

2. Jurisdiction and Resource Protection Setback: Except as permitted by the Conservation Commission or as provided in this Bylaw, no person shall commence to remove, fill, dredge, or discharge into, or otherwise alter the following resource areas: any freshwater wetlands; marshes; flats; wet meadows; bogs; swamps; vernal pools; banks; lakes; ponds of any size; rivers; streams; creeks; beaches; lands under water bodies; lands subject to flooding or inundation by groundwater or surface water ; and the one hundred (100) foot Buffer Zone to any of the aforementioned resource areas or lands abutting any of the aforesaid resource areas. Said resource areas shall be protected whether or not they border surface waters. In addition to the requirements of the Wetlands Protection Act, there shall be a 25-foot-wide undisturbed, vegetated strip of naturally occurring plant species maintained between wetland resource areas (310 CMR 10.02(1), excluding land subject to flooding and riverfront area) and activities, as

defined in the Wetlands Protection Act Regulations. In addition, no structures shall be permitted within 40 feet of any wetland in order to provide for the aforementioned 25-foot buffer and safe and adequate access around said structures. The purpose of the 25-foot undisturbed strip is to filter out pollutants and sediment before they reach waterways, to help with floodwater absorption, and to support wildlife habitat. This additional requirement shall apply to all activities subject to the Wetlands Protection Act, except the following:

- a. Activities with either current Board of Health permits, non-expired Orders of Conditions, or non-expired Determinations of Applicability as of March 21, 2005, or activities for which complete Notices of Intent or Requests for Determination have been submitted, but not acted upon, prior to March 21, 2005.
- b. "Limited projects" as defined by the Wetlands Protection Act Regulations General Provisions 310 CMR 10.00. These projects, more particularly described in 310 CMR 10.53(3), include but are not limited to public utilities, public roadways, agricultural projects, water-dependent uses, and access driveways and roadways.
- c. "Exempt Activities" as defined by the Wetlands Protection Act Regulations 310 CMR 10.58(6). These include, but are not limited to, the maintenance of existing landscaping, such as lawn mowing.
- d. Emergency projects, as defined in 310 CMR 10.06.
- e. Repairs to or replacement of an existing sewage disposal system, including required grading allowed under 310 CMR 10.03(3).
- f. Activities determined by the Conservation Commission to have no adverse effect on resource area values. The burden of proof for such a finding is on the applicant.
- g. Activities on any lot legally in existence prior to March 21, 2005.

Waivers from the 40-foot setback and the 25-foot buffer requirements in the Bylaw may be granted where public benefits, such as health and safety, outweigh any adverse effect on resource values. The burden of proof for such a finding is on the applicant.

3. Filing Fees: After due notice and public hearing, the Commission may promulgate rules and regulations, including a filing fee schedule, to effectuate the purposes of this Bylaw. Notice of the time and place of the hearing shall be given by the Conservation Commission not less than fourteen (14) days prior to the hearing by publishing in a newspaper of general circulation (in Shirley) and by posting at the Town Offices. Failure by the Commission to promulgate such rules and regulations or a legal declaration of their invalidity by a court of law shall not act to suspend or invalidate the effect of this Bylaw.
4. Third Party Review: In addition to any filing fee imposed by this Bylaw, the applicant shall reimburse the reasonable costs and expenses borne by the Commission for specific expert engineering and consulting services deemed necessary by the Commission, provided that the

scope of the application meets the criteria set forth below. The amount of the reimbursement fee shall be based on the standard set forth below.

The Commission is authorized to charge this site and/or design review reimbursement fee when the Commission determines that a Notice of Intent, Request for Determination, or Certificate of Compliance involves any of the following: 500 square feet or greater of alteration of Freshwater Wetlands; 50 linear feet or greater of alteration of a Bank, Stream, or River; 500 square feet of Land Under Bodies of Water; discharge of any pollutants into surface or ground waters of any resource area under this Bylaw; or construction of a detention or retention basin or other drainage device.

Said specific expert engineering and consultant services may include but are not limited to consultants' overhead and office expenses required to process said Notices, Requests, and Certificates; copying plans and technical submittals for further review; subcontracting for professional services; mileage; wetland survey and delineation; hydrogeologic and drainage analysis; purchase or borrowing of materials; wildlife habitat, rare species, shellfish and fisheries evaluation; and environmental or land use legal consultation.

Said reimbursement fee shall be paid by the applicant within thirty (30) calendar days of receipt of a written request from the Commission. Said payment may be required by the Commission at any point in the reviewing or deliberating processes but not before the Commission has provided the applicant with a written estimate of the cost of the services to be provided. The fee shall be paid to the Town and deposited into a special account established under Chapter 44, Section 53G of the General Laws and shall be expended by the Commission for services approved by the Commission at a public meeting.

In setting the amount of said reimbursement fee, the Commission shall utilize the following standard: the fee shall equal the amount of the actual bills for all expenses incurred for the File Number that are submitted by an expert engineer or consultant.

5. Appeals: In the event that any person has been aggrieved by a decision of the Shirley Conservation Commission under this Bylaw, or by its failure to act thereunder, such person may appeal under M.G.L. Chapter 249, Section 4.
6. Severability: The invalidity of any section or provision of this Bylaw shall not invalidate any other section or provision thereof, nor shall it invalidate any permit or determination that previously has been issued.
7. Relationship to the Wetlands Protection Act: This Bylaw is adopted under the Home Rule Amendment of the Massachusetts Constitution and the Home Rule statutes, independent of the Wetlands Protection Act (M.G.L. Chapter 131, Section 40) and Regulations (310 CMR 10.00) thereunder. Unless otherwise stated in this Bylaw, the areas of jurisdiction, definitions, provisions, procedures, and performance standards of the Wetlands Protection Act (M.G.L. Chapter 131, Section 40) and Regulations (310 CMR 10.00) as in effect on February 23, 2005 shall continue to apply.

8. Enforcement:

- a. The filing of a Notice or Request shall constitute the consent of the owner and the grant of authority for the Commission, its agents, officers, and employees to enter upon privately owned land for the purpose of performing their duties under this Bylaw and to make or cause to be made such examinations, surveys, or sampling as the Commission deems necessary.
- b. The Commission shall have the authority and duty to enforce this Bylaw, its regulations, and Orders of Conditions issued hereunder by Enforcement Orders and civil and criminal court actions.
- c. When the Commission determines that violation of this Bylaw has occurred, it may request the Board of Selectmen and the Town Counsel to take legal action for enforcement under civil law. In addition, the Commission may request the Chief of Police or other authorities to take legal action for enforcement under criminal law.
- d. Municipal boards and officers, including any police officer or other officer having police powers, shall have authority to assist the Commission in enforcement.
- e. Any person who violates any provision of this Bylaw may be punished by a fine of not more than three hundred dollars (\$300.00) per offense. Each day or portion thereof during which a violation continues shall constitute a separate offense, and each provision of the Bylaw, regulations, or Order of Conditions violated shall constitute a separate offense.
- f. In the alternative to criminal prosecution, the Commission may elect to utilize the non-criminal disposition procedure set forth in Massachusetts General Laws Ch. 40, Sec. 21D, in which case the penalty shall be as follows:

First offense:	\$ 25.00
Second offense:	\$100.00
Third and subsequent offenses:	\$300.00
- g. No person shall remove, fill, dredge, or alter any Area Subject to Protection under this Bylaw without the required authorization, or cause, suffer or allow such activity, or leave in place unauthorized fill, or otherwise fail to restore illegally altered land to its original condition, or fail to comply with an Enforcement Order issued pursuant to this Bylaw. Each day such violation continues constitutes a separate offense.
- h. Any person who purchases, inherits, or otherwise acquires real estate upon which work has been done in violation of the provisions of this Bylaw or in violation of any Order issued under this Bylaw shall forthwith comply with any such Order or restore such real estate to its condition prior to any such violation; provided, however, that no action, civil or criminal, shall be brought against such person unless such action is commenced within three (3) years following the recording of the deed or the date of the death by which such real estate was acquired by such person.

Potential Sewer Units shall be calculated on the basis of Zoning By-Law provisions in effect on the date said assessment is made. For the purpose of calculating Sewer Units, each building lot shown on a plan recorded at the Middlesex Registry of Deeds, shall be considered a separate lot from contiguous parcels in common ownership. ARTICLE XXVIII
SEX OFFENDERS

FINDINGS AND INTENT

A. It is the intent of this by-law to serve and to protect the Town's compelling interest to promote, protect and improve the health, safety and welfare of the citizens of the Town by creating areas around locations where children, or the elderly regularly congregate in concentrated numbers wherein certain registered sex offenders are prohibited from loitering and establishing temporary or permanent residence.

B. After careful consideration, the Town finds that this by-law is the most narrowly tailored means of limiting, to the fullest extent possible, the opportunity for registered sex offenders to approach or otherwise come in contact with children, or the elderly in places where children, or the elderly would naturally congregate, and that the protection of the health and safety of our children, and elderly is a compelling governmental interest.

C. By the enactment of this or any other by-law, the Town understands that it cannot remove the threat posed to or guarantee the safety of children, or the elderly, or assure the public that registered sex offenders will comply with the mandates of this statute. This legislation is intended to create a civil, non-punitive regulatory scheme in order to protect children, and the elderly to the extent possible under the circumstances and not as a punitive measure of any kind.

D. Registered sex offenders pose a clear threat to the children, and the elderly residing or visiting in the community. Because registered sex offenders are more likely than any other type of offender to reoffend for another sexual offense, the Town desires to impose safety precautions in furtherance of the goal of protecting the children and elderly. The purpose of this by-law is to reduce the potential risk of harm to children and the elderly the community by impacting the ability for registered sex offenders to be in contact with unsuspecting children and the elderly in locations that are primarily designed for use by or are primarily used by children and the elderly, the grounds of a public or private school for children, a center or facility that provides day care or children's services, a park, other public recreational facility, elderly housing facilities or the Senior Citizens Center. ARTICLE XXXII **STORMWATER MANAGEMENT CONTROL BYLAW**

Introduction

The Town of Shirley hereby determines that:

Land development projects and other land use conversions, and their associated changes to land cover, permanently alter the hydrologic response of local watersheds and increase stormwater runoff rates and volumes, which in turn have led to increased flooding, stream channel erosion, and sediment transport and deposition, and decreased groundwater recharge.

As the area of house and building roofs, parking lots and road surfaces increase, the rate of stormwater runoff from these surfaces increases, along with the preponderance of greater flooding. Unregulated stormwater runoff from historic development has led to the flooding we see today.

Land development projects and other land use conversions also contribute to increased non-point source pollution and degradation of receiving waters.

The impacts of post-development stormwater runoff quantity and quality can adversely affect public safety, public and private property, drinking water supplies, groundwater resources, recreation, aquatic habitats, fish and other aquatic life, property values and other uses of lands and waters.

These adverse impacts can be controlled and minimized through the regulation of stormwater runoff quantity and quality from new development and re-development, by the use of both structural and non-structural Best Management Practices.

Localities in the Commonwealth of Massachusetts are required to comply with a number of both State and Federal laws, regulations and permits which require a locality to address the impacts of post-development stormwater runoff quality and non-point source pollution.

The United States Environmental Protection Agency has determined that it is in the public interest to regulate post-development stormwater runoff discharges in order to control and minimize increases in stormwater runoff rates and volumes, flooding, post-construction soil erosion and sedimentation, stream channel erosion, and non-point source pollution associated with post-development stormwater runoff.

Therefore, the Town of Shirley has established this Stormwater Management Bylaw to provide reasonable guidance for the regulation of post-development stormwater runoff for the purpose of protecting local water resources from degradation. This Bylaw regulates the post-construction stormwater controls for both new and re-development projects.

1.0 Purpose

The purpose of the Bylaw is to protect, maintain and enhance the public health, safety, environment and general welfare by establishing minimum requirements and procedures to control the adverse effects of increased post-development Stormwater runoff, flooding and non-point source pollution associated with new development and re-development and to comply with Phase II NPDES Stormwater requirements. It is the underlying intent that proper management of post-development stormwater runoff will minimize flood damage to the public and private property and infrastructure, safeguard the public health, safety, environment and general welfare of the public, protect water and aquatic resources, and promote groundwater recharge to protect surface and groundwater drinking supplies.

The objectives of this Bylaw are:

1. Establish decision-making processes surrounding land development activities that protect the integrity of the watershed and preserve the health of water resources;
2. Require that new development, re-development and all land conversion activities result in after-development runoff characteristics that are equal to or less than the pre-development runoff characteristics in order to reduce flooding, stream bank erosion, siltation, non-point source pollution, property damage, and to maintain the integrity of stream channels and aquatic habitats;
3. Establish minimum post-development stormwater management standards and design criteria for the regulation and control of stormwater runoff quantity and quality; establish minimum design criteria for the protection of properties and aquatic resources downstream from land development and land conversion activities from damages due to increases in volume, velocity, frequency, duration, and peak flow rate of stormwater runoff; and establish minimum design criteria for measures to minimize non-point source pollution from stormwater runoff which would otherwise degrade water quality;

4. Establish design and application criteria for the construction and use of structural stormwater control facilities that can be used to meet the minimum post development stormwater management standards;
5. Encourage the use of non-structural stormwater management measures and better site design practices or “low-impact development practices”, such as reducing impervious cover and the preservation of green space and other natural areas, to the maximum extent practicable; and coordinate site design plans, including green space, with the Town of Shirley’s design guidelines;
6. Establish provisions for the long-term responsibility and maintenance of structural stormwater control facilities and non-structural stormwater management practices to ensure that they continue to function as designed, are maintained, and pose no threat to public safety;
7. Establish provisions to ensure there is an adequate funding mechanism, including financial security or surety, for the proper review, inspection and long-term maintenance of stormwater facilities implemented under this Bylaw;
8. Establish administrative procedures and fees for the submission, review, approval or disapproval of stormwater management plans, the inspection of approved active development projects, and for long-term follow-up inspection to ensure ongoing care of approved facilities.
9. Establish the Town of Shirley’s legal authority to ensure compliance with the provisions of this Bylaw through inspection, monitoring and enforcement.

Nothing in the Bylaw is intended to replace the requirements of the Town of Shirley Wetlands Protection Bylaw or any other Bylaw or regulations that may be adopted by the Town of Shirley, or any State or Federal requirement, law, regulation or policy. Any activity subject to the provisions of this Bylaw must comply with the requirements of all other applicable laws and regulations.

2.0 Definitions

The definitions contained herein apply to issuance of a Stormwater Management Permit established by the Town of Shirley Stormwater Management Bylaw. Terms not defined in this section shall be construed according to their customary and usual meaning unless the context indicates a special or technical meaning.

ALTERATION: Any activity on an area of land that changes the water quality, force, direction, timing or location of runoff flowing from the area. Such changes shall include but not be limited to, change from distributed runoff to confined; discrete discharge; change in the volume of runoff from the area; change in the peak rate of runoff from the area; and change in the recharge to groundwater on the area.

APPLICANT: Any person, individual, partnership, association, firm, company, corporation, trust, authority, agency, department, or political subdivision of the Commonwealth or the Federal government to the extent permitted by law requesting a Stormwater Management Permit for proposed land-disturbance activity.

CHANNEL: A natural or artificial watercourse with a definite bed and banks that conducts continuously or periodically flowing water.

CLEAN WATER ACT: The Federal Water Pollution Control Act (33 U.S.C. Section 1251 et seq.) and as it is amended from time to time.

DETENTION: The temporary storage of storm runoff in a stormwater management facility, with the goals of controlling peak discharge rates and providing gravity settling of pollutants.

DEVELOPMENT: The modification of land to accommodate a new use or expansion of use, usually involving construction.

DISCHARGE OF POLLUTANTS: The addition from any source of any pollutant or combination of pollutants into the storm drain or into waters of the United States or Commonwealth from any source.

EROSION: The wearing away of the land surface by natural or artificial forces such as wind, water, ice, gravity or vehicle traffic and the subsequent detachment and transportation of soil particles.

EROSION CONTROL: A measure that prevents migration of eroded material.

EROSION AND SEDIMENTATION CONTROL PLAN: A document containing narrative, drawings and details developed by a Registered Professional Engineer duly licensed in the state of Massachusetts which includes stabilization and other measures designed to control surface runoff, erosion and sedimentation during pre-construction and construction related land disturbance activities.

GRADING: Changing the level or shape of the ground surface.

GROUNDWATER: Water beneath the surface of the ground.

IMPERVIOUS SURFACE: Any material or structure on or above the ground that prevents water infiltration to the underlying soil. Impervious surface includes, without limitation, roads, paved parking lots, sidewalks, rooftops, compacted soils, hard-packed gravel driveways and similar surfaces.

INFILTRATION: The process of percolating stormwater into the sub-soil.

LAND DISTURBANCE ACTIVITY: Any activity which changes the volume or peak flow discharge rate of rainfall from the land surface. This shall include but not be limited to grading, removal of roots or stumps, digging, cutting, scraping, or excavating of soil, placement of fill materials, paving, construction, substantial removal of vegetation, or any activity which bares soil or rock or involves the diversion or piping of any natural man-made watercourse.

LOW IMPACT DEVELOPMENT (LID): An approach to environmentally friendly land use planning. It includes a suite of landscaping and design techniques designed to maintain the natural, pre-developed ability of a site to manage rainfall. LID techniques capture water on site, filter it through vegetation, and allow seeping into the ground rather than being lost as surface runoff so that the local water table can recharge. An important LID principle embodies the concept that rainwater is a resource and not merely a superfluous waste product. See section 4.2A Town of Shirley Zoning Bylaws.

MASSACHUSETTS STORMWATER MANAGEMENT POLICY: The policy issued by the Department of Environmental Protection, as amended, that coordinates the requirements prescribed by state regulations promulgated under the authority of the Massachusetts Wetlands Protection Act G.L. c. 131 § 40 and Massachusetts Clean Waters Act G.L. c. 21 § 23-56. The policy addresses stormwater impacts through implementation of performance standards to reduce or prevent pollutants from reaching water bodies and control the quantity of runoff from a site.

MUNICIPAL STORM DRAIN SYSTEM or MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4): The system of conveyances designed or used for collecting or conveying stormwater, including any road with a drainage system, street, gutter, curb, inlet, piped storm drain, pumping facility, retention or detention basin, natural or manmade or altered drainage channel, reservoir, and other drainage structure that together comprise the storm drainage system owned or operated by the Town of Shirley.

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) STORM WATER DISCHARGE PERMIT: A permit issued by United States Environmental Protection Agency or jointly with the State that authorizes the discharge of pollutants to waters of the United States.

NON-POINT SOURCE POLLUTION: Pollution from many diffuse sources caused by rainfall or snowmelt moving over and through the ground. As the runoff moves, it picks up and carries away natural and human-made pollutants, finally depositing them into water resource areas.

OPERATION AND MAINTENANCE PLAN: (OMP) A plan describing the functional, financial and organizational mechanisms for the ongoing operation and maintenance of a stormwater management system to ensure that it continues to function as designed.

PERMIT GRANTING AUTHORITY: The Permit Granting Authority for Town of Shirley shall be the Planning Board or their authorized agent(s). The Permit Granting Authority is responsible for coordinating the review, approval and permit process as defined in this bylaw. Other boards and/or departments may participate in the review process as defined in this Bylaw or the Stormwater Regulations. The Conservation Agent, DPW Director and the Zoning Enforcement Officer are authorized to act as agents of the Permit Granting Authority in enforcing this Bylaw.

PERSON: An individual, partnership, association, firm, company, trust, corporation, agency, authority, department or political subdivision of the Commonwealth or federal government, to the extent permitted by law, and any officer, employee, or agent of such person.

POINT SOURCE: Any discernible, confined and discrete conveyance, including but not limited to, any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, or container from which pollutants are or may be discharged.

POLLUTANT: Any element or property of sewage, agricultural, industrial or commercial waste, runoff, leachate, heated effluent, or other matter whether originating at a point or non-point source, that is or may be introduced into any sewage treatment works or waters of the Commonwealth. Pollutants shall include, without limitation:

- 1) Paints, varnishes and solvents;
- 2) Oil, antifreeze and other automotive fluids;
- 3) Non-hazardous liquid and solid wastes and yard wastes;
- 4) Refuse, rubbish, garbage, litter, or other discarded or abandoned objects, ordnance, accumulations and floatables;
- 5) Pesticides, herbicides, and fertilizers;
- 6) Hazardous materials and wastes, sewage, fecal coliform and pathogens;
- 7) Dissolved and particulate metals;
- 8) Animal wastes;
- 9) Rock, sand, salt, soils;
- 10) Construction wastes and residues; and
- 11) Noxious or offensive matter of any kind.

POST-DEVELOPMENT: Conditions that reasonably may be expected or anticipated to exist after completion of the land development activity on a specific site or tract of land. Post-development refers to conditions after culmination of a new development or re-development project and does not depict conditions during the construction phases of a project.

PRE-DEVELOPMENT: The conditions that exist at the time that plans for the land development of a tract of land are submitted to the Permit Granting Authority. Where phased development or phased plan approval occurs (preliminary grading, roads, utilities, etc.), the existing conditions at the time prior to the first plan submission shall establish pre-development conditions.

RECHARGE: The replenishment of underground water reserves.

REDEVELOPMENT: Development, rehabilitation, expansion, demolition or phased projects that disturb the ground surface or increase the impervious area on previously developed sites.

RESOURCE AREA: Any area protected under the Massachusetts Wetlands Protection Act, the Massachusetts Rivers Act, or the Town of Shirley Wetlands Bylaw.

RUNOFF: Rainfall, snowmelt or irrigation water flowing over the ground surface.

SEDIMENT: Mineral or organic soil material that is transported by wind or water from its origin to another location; the product of erosion processes.

SEDIMENT CONTROL: Measures that prevent eroded sediment from leaving the site or entering off-site drainage structures.

SITE: A parcel of land or a contiguous combination thereof, where land disturbing work is performed.

STABILIZATION: The use, singly or in combination, of mechanical, structural or vegetative methods to prevent or retard erosion.

START OF DEVELOPMENT: The first land-disturbing activity associated with a development, including but not limited to, land preparation such as clearing, grading and filling; installation of streets and walkways; excavation for basements, footings, piers or foundations; erection of temporary forms; and installation of accessory buildings such as garages.

STORMWATER: Stormwater runoff, snow melt runoff, and surface water runoff and drainage.

STOP WORK ORDER: An order issued which requires that all construction activity on a site will be stopped.

STORMWATER MANAGEMENT PERMIT: A permit issued by the Permit Granting Authority, after review of an application, plans, calculations and other supporting documents, that is designed to protect the Town from deleterious effects of uncontrolled or untreated stormwater runoff.

STORMWATER MANAGEMENT PLAN: A document containing narrative, drawings and details prepared by a Registered Professional Engineer duly registered in the State of Massachusetts, that includes structural and non-structural best management practices (BMPs) to manage and treat stormwater runoff generated from regulated development activity. A Stormwater Management Plan also includes an Operation and Maintenance Plan and an Erosion and Sedimentation Control Plan.

WATERCOURSE: A natural or man-made channel through which water flows or a stream of water, including a river, brook, or underground stream.

WATERS OF THE COMMONWEALTH: All waters within the jurisdiction of the Commonwealth, including without limitations, rivers, streams, lakes, ponds, springs, impoundments, estuaries, wetlands, coastal waters, and groundwaters.

3.0 Authority

This Bylaw is adopted under authority granted by the Home Rule Amendment of the Massachusetts Constitution, the Home Rules statutes, and pursuant to the regulations of the Federal Clean Water Act found at 40 CFR 122.34, and as authorized by the residents of the Town of Shirley at Town Meeting, dated April 7, 2008

4.0 Jurisdiction

No person shall undertake a regulated activity as described below, without a Stormwater Management Permit from the Permit Granting Authority.

A.) Regulated Activities shall include any of the following:

1. Land disturbance of greater than one acre (43,560 square feet), associated with construction or re-construction activities.
2. Development or re-development involving multiple, separate activities in discontinuous locations or on different schedules if the activities are part of a larger common plan of development that together disturbs one acre or more.
3. Paving or other change in surface material over an area of one acre or more causing a significant reduction of permeability or increase in runoff.
4. Construction of a new drainage system or alteration of an existing drainage system or conveyance serving a drainage area of more than one acre.
5. Any other activity altering the surface of an area exceeding one acre that will, or may, result in increased stormwater runoff flowing from the property into a public way, the municipal storm drain system, or to a watercourse or wetland. An exception is the removal of tree cover when the stumps are left in place.

B.) Exempt Activities

1. Normal maintenance and improvement of land in agricultural or forestry use as defined by the Massachusetts Wetlands Protection Act and its Regulations.
2. The construction of fencing, irrespective of materials used, that will not alter existing terrain or drainage patterns.
3. Construction, maintenance and operation of utilities (gas, water, sewer, electric, telephone, etc.) other than drainage that will not alter terrain or drainage patterns.

5.0 Administration

The Shirley Planning Board shall administer, implement and enforce this Bylaw. Any powers granted to or duties imposed upon the Planning Board may be delegated in writing by the Planning Board to its employees or agents (who may include the Conservation Agent, the DPW Director and the Zoning Enforcement Officer).

6.0 Regulations

The Shirley Permit Granting Authority may adopt and periodically amend stormwater rules and regulations relating to receipt and content of applications for an SMP, review time periods, permit terms, conditions, additional definitions, enforcement, fees (including application, inspection, ongoing maintenance and/or consultant fees), procedures, administration and enforcement of this Bylaw subsequent to a majority vote of a meeting of the Permit Granting Authority and after conducting a public hearing to receive comments on the proposed regulations and/or any proposed revisions. Such hearing dates shall be advertised in a newspaper of general local circulation at least fourteen (14) calendar days before a hearing date. Failure by the Permit Granting Authority to promulgate such rules and regulations shall not have the effect of suspending or invalidating this Bylaw.

7.0 Permits and Procedures

Public Hearing.

The Board shall make a determination of the completeness of an application within twenty-one (21) calendar days from the submittal. The Board shall hold a public hearing within twenty-one (21) calendar days of the receipt of a complete application as specified by the regulations and shall take final action within twenty-one (21) calendar days from the time of the close of the hearing unless such time is extended by agreement between the applicant and The Board. Notice of the public hearing shall be given by publication and posting and by first-class mailings to all abutters at least fourteen (14) calendar days prior to the hearing. The Board shall make the application available for inspection by the public during business hours at Shirley Permit Granting Authority office. All expenses associated with the notice of Public Hearing shall be at the applicant's expense. The Board, at its discretion, may hold concurrent public hearings for other hearings required under state, federal or local law or Bylaws.

Start of Development.

Prior to the start of development the following items must be met.

1. There shall be a fourteen (14) calendar day waiting period from the close of the hearing to allow for any appeals of the Permit Granting Authority's procedures and subsequent decision. Any and all appeals shall be rectified before any Start of Development.
2. The approved permit and order of conditions shall be provided to the applicant and the applicant shall record such permit and order of conditions with the proper registry of deeds.

Proof of recordation shall be provided to the Permit Granting Authority before any Start of Development.

Certificate of Completion.

Upon the completion of the activities allowed under the stormwater management permit (not including the continuing and ongoing requirement of compliance with the Operation and Maintenance Plan), the applicant shall notify the Permit Granting Authority and request a final inspection and Certificate of Completion. The applicant shall submit an as-built plan prepared by a registered professional engineer along with a certification from the same that all construction has been done in accordance with the approved Stormwater Management Permit. The Permit Granting Authority may hire its own consultant to advise on completion at a cost to be received from the applicant before issuance of the Certificate of Completion.

8.0 Fees

The Permit Granting Authority shall establish fees for the submission, review, approval or disapproval of stormwater management plans, the inspection of approved active development projects, and for long-term follow-up inspection and ongoing maintenance to ensure ongoing care of approved facilities.

A. Application fees.

The Permit Granting Authority by regulation shall promulgate an application fee schedule for Stormwater Management Permit applications and Completion Certificates. The fee schedule shall be reasonably related to the costs of processing, reviewing, acting upon the application and the administration of the permit including inspections carried out in support of the permit. The fee specified in such a fee schedule shall be made payable to the Town of Shirley and shall accompany the permit application.

The Permit Granting Authority may require an additional fee for review of any change in or alteration from an approved permit.

B. Operation and Maintenance fees.

The Permit Granting Authority shall assess a Stormwater Management Plan Operations and Maintenance Fee payable by the applicant to cover the recurring cost to the Town of implementing and carrying out the stormwater management plan. In establishing said O&M Fee this bylaw recognizes that a distinction exists which separates “normal” operations and maintenance from “specialized” operations and maintenance.

Normal O&M – Operations and maintenance services are those which are normally and routinely carried out by the Town of Shirley for the following BMP’s. These BMPs provide a service or benefit to the town as a whole, and which do not result from use of any specialized BMP device: Deep sump catch basins, drainage manholes, cross-culverts which convey water from one side of a public roadway to the opposite side of said roadway, drainage pipes that are buried beneath and within the layout of public ways, pipes and manholes which connect drainage facilities within public ways to any extended detention

basin, extended detention basins (including sediment forebays, and inlet and outlet control structures) whose exclusive purpose is flood peak attenuation.

Specialized O&M – Operations and maintenance services for any other BMP device not listed above and/or any stormwater management device which is unique to a specialized stormwater management practice. Specialized O&M is one which results from an applicant's choice of use of a specialized BMP device over a normal BMP device. The applicant's choice to use a specialized BMP device provides a service or benefit that is unique to the development plan for the land and thus is deemed to impose an increased and undue municipal burden (service and cost) by its use.

C. Professional Consultant fees.

In addition to any filing fee imposed by this bylaw, the applicant shall reimburse the reasonable costs and expenses borne by the Permit Granting Authority for specific expert engineering and consulting services deemed necessary by the Permit Granting Authority. Said reimbursement fee shall be paid by the applicant within Thirty (30) calendar days of receipt of a written request from the Permit Granting Authority. Said payment may be required by the Permit Granting Authority at any point in the reviewing or deliberation processes but not before the Permit Granting Authority has provided the applicant with a written estimate of the cost of the services to be provided. The fee shall be paid to the Town of Shirley and deposited into an account established under Chapter 44 Section 53E½ of the general laws and shall be expended by the Permit Granting Authority for services approved by the Permit Granting Authority at a public meeting.

In setting the amount of said reimbursement fee, the Permit Granting Authority shall utilize the following standard: The fee shall equal the amount of the actual bills for all expenses incurred that are submitted by an expert engineer or consultant.

9.0 Waivers

- A.) The Permit Granting Authority may waive strict compliance with any requirement of this Bylaw or the rules and regulations promulgated hereunder, where such action:
 - 1. Is allowed by federal, state and local statutes and/or regulations;
 - 2. Is in the public interest;
 - 3. Is not inconsistent with the purpose and intent of this Bylaw.
- B.) Any applicant may submit a written request to be granted such a waiver. Such a waiver request shall be accompanied by an explanation or documentation supporting the waiver request and demonstrating that strict application of this Bylaw does not further the purposes or objectives of this Bylaw.
- C.) All waiver requests shall be discussed by the Permit Granting Authority and a decision will be made by the Permit Granting Authority within 30 days of receiving the waiver request.

- D.) If, in the Permit Granting Authority's opinion, additional time or information is required for review of a waiver request, the Permit Granting Authority may continue consideration of the waiver request to a date certain announced at the meeting. In the event the applicant objects to a continuance, or fails to provide the requested information, the waiver request shall be denied.

10.0 Inspections

Filing an application for a Stormwater Management Permit grants the Permit Granting Authority, or its agent, permission to enter the site of the land-disturbing activity, as permitted by law, to verify the information in the application and to inspect for compliance with permit conditions. In the case of the projects that require an Operation and Maintenance plan, the applicant grants permission to the Permit Granting Authority or its agent to conduct periodic inspections to determine that the O&M plan is being carried out in accordance with the approved plans. The Permit Granting Authority, in their discretion, may conduct an inspection at any stage of land-disturbing activity to ensure compliance with the terms of this Bylaw and any permit. The Permit Granting Authority also may require the applicant to submit self-inspection reports at any stage of development or post-development.

11.0 Enforcement

The Permit Granting Authority, or an authorized agent of the Permit Granting Authority, shall enforce this Bylaw, its regulations, orders, stop work orders, violation notices, and enforcement orders, and may pursue all civil and criminal remedies for such violations.

A) Civil Relief

If a person violates the provisions of this Bylaw, regulations, permit, notice or order issued thereunder, the Permit Granting Authority may seek injunctive relief in a court of competent jurisdiction restraining the person from activities which would create further violations or compelling the person to perform abatement or remediation of the violation.

B) Access Permission

To the extent permitted by law, or if authorized by the owner or other party in control of the property, the Permit Granting Authority, its agents, officers and employees may enter upon privately owned property for the purpose of performing their duties under the Stormwater Bylaw and the regulations and may make or cause to be made such examinations, surveys or sampling and photography as the Permit Granting Authority deems reasonably necessary to determine compliance with the permit.

C) Orders

The Permit Granting Authority, or its authorized agent, may issue a written order to enforce the provisions of this Bylaw, or the regulations thereof, which may include:

1. A requirement to cease and desist from the land-disturbing activity until there is compliance with the Bylaw or provisions of the Stormwater Management Permit;
2. Maintenance, installation or performance of additional erosion and sediment control measures;
3. Monitoring, analyses, and reporting;
4. Remediation of erosion and sedimentation resulting directly or indirectly from the land-disturbing activity;
5. Compliance with the Stormwater Management Plan and Permit;
6. Repair, maintenance or replacement of the stormwater management system or portions thereof in accordance with the Operation and Maintenance Plan.
7. Remediation of adverse impact resulting directly or indirectly from malfunction of the stormwater management system. If the enforcing person determines that abatement or remediation of erosion and sedimentation is required, the order shall set forth a deadline by which such abatement or remediation must be completed.

D) Criminal Penalty

Any person who violates any provision of this Bylaw, regulation, order or permit issued there under, shall be punished by a fine of not more than \$300.00. Each day or part there under that such violation occurs or continues shall constitute a separate offense.

E) Non-Criminal Disposition

As an alternative to criminal prosecution or civil action, the Town may elect to utilize the non-criminal disposition procedure set forth in M.G.L. c. 40, § 21D, which has been adopted by the Town in Article XX of the Town's General Bylaws, in which case the Permit Granting Authority or authorized agent shall be the enforcing person. The penalty for each violation shall be \$50.00 for the first violation, \$100.00 for the second violation, and \$300.00 for the third and subsequent violations. Each day or part thereof that such violation occurs or continues shall constitute a separate offense.

F) Appeals

The decision or orders of the Permit Granting Authority shall be final. Further relief shall be requested by petition to a court of competent jurisdiction.

G) Remedies Not Exclusive

The remedies listed are not exclusive of any other remedies available under any applicable Federal, State or local law.

12.0 Public Education

The Permit Granting Authority, within its available resources, shall provide educational programs on soil erosion, sediment control and stormwater management to the general public and persons regulated by this bylaw. The Permit Granting Authority shall provide guidelines and advice to ease the permit application process and foster acceptance of good erosion control and stormwater management practices.

13.0 Severability

If any provision, paragraph, sentence, or clause of this Bylaw is held invalid for any reason by a court of competent jurisdiction all other provisions shall continue in full force and effect.

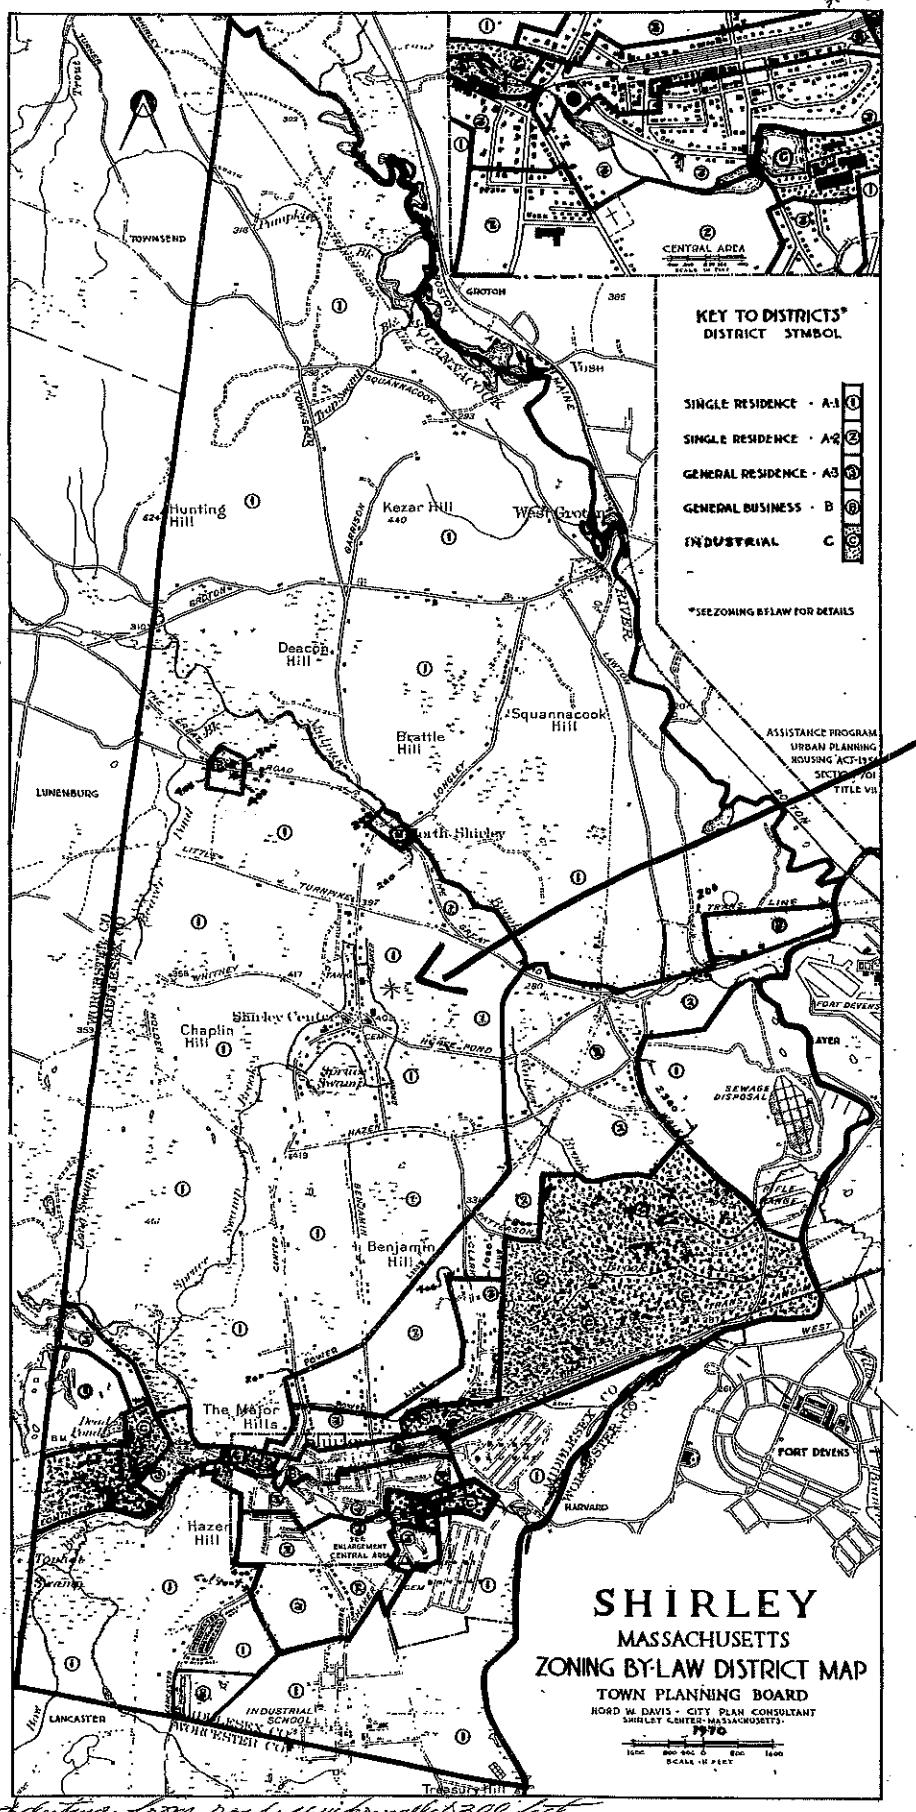

14.0 Effective Date

This Bylaw shall take effect in accordance with M.G.L. c.40, s32.
